5 O'clock Edition!

CHILIAN SITUATION.

Chili Demanded the Recall of Egan.

UNITED STATES GUN BOATS

Will Probably be Sent to Chili.

To Compel Respect for the American Flag.

Must Respect Our Flag.

New York, Oct. 30.—Washington special says the naval officers are confident the dispute with Chili can only be settled by a display of force by this government. Talk about available vessels and the possibility of assembling a sufficient fleet before Valparaiso to compel Chili respect is animated among the naval men and officers who are beginning to think of active duty.

Admiral Gherard, unofficially suggested to the Navy Department that he be ordered to sail for Valparaiso at once with the Philadelphia and Concord. It seems probable his suggestion will be acted upon, though no orders have yet been issued.

The presence of a United States fleet would probably bring to Valparaiso a large fleet of vessels of the British navy. The British interests in Chili are large, and it is assumed that any demonstration by the United States would be watched with concern by the British fleet, and that if a determination to shell the city were reached by this government the lives and property of the subjects of Great Britain would have to be considered. The suggestion of British intervention is not likely, however, to deter the United States from following a course that will compel respect for our flag and an expression of regret for taking the lives of men wearing the uniform of the United States.

Despite the excitement reported prevailing in consequence of the curt reply of the Chilean government to the demands of the United States, there are no signs of preparations for hostilities. The Brooklyn navy yard. The impression prevailing among the officers of this naval station is there will be no trouble.

WASHINGTON, Oct. 30.—Senator Montt, official representative of the Chilean government, has just received the following dispatch from the Chilean Minister of Foreign Affairs at Santiago: "The investigation which was instituted immediately continues with all diligence, and is not yet finished. The trouble began in Slave street and soon became a tumult; the regular soldiers, police and special guard of the intendente restored the order of the combatants. Thirty Americans and eleven Chileans were committed before the judicial authorities. They fought with knives, stones and everything they could lay their hands upon. There was one killed and several wounded. It is estimated that 160 American sailors from the Baltimore were ashore at the time of the tumult."

SANTIAGO DE CHILI, Oct. 30.—It is generally admitted here that the situation of affairs in regard of the dispute between the United States and Chili is not improved, in fact the anti-American feeling is growing in bitterness, and all the American officials in Chili are apprehensive that further trouble is brewing. The exact nature of this trouble they are unable to define, but they see little prospect of an amicable settlement. The Valparaiso incident will soon be reached, and signs of the increasing popular animosity towards the United States, give ground for apprehension and indignation.

United States Minister Egan, Captain Solley of the Baltimore and Consul McCreery were in close consultation throughout the day, though it is not possible to obtain any definite statement from them for publication.

Duty on American Park. By Cable and Associated Press. PARIS, Oct. 30.—The Senate has agreed to the removal of the prohibition upon the importation of American salt pork, and voted in favor of the imposition of a duty upon that article of food at 25 francs.

Weather Report. Special to the Gazette. SAN FRANCISCO, Oct. 30.—Forecast, fair weather.

English Press Comments.

By Cable and Associated Press. LONDON, Oct. 30.—The Times today publishes an article signed "An American," asserting that the attitude of the United States in regard to Chili is entirely due to the approaching election.

The evening newspapers comment at length upon the strained relations existing between the United States and Chili. According to the Pall Mall Gazette there is no doubt that much of the excitement is due to the elections. "Nobody," says the Gazette, "seriously believes that President Harrison will push matters to extremities. Neither the sympathies of other countries nor the majority of Americans will be with him."

The St. James Gazette, referring to the same subject, remarks that whether President Harrison's rising indignation or Blaine's electioneering calculations will result in war is doubtful. "The Chileans," the Gazette continues, "are not now in the mood to submit to bullying. If the Americans have grievances for which they can legitimately demand redress, Chili has equal reason to complain of the conduct of Egan. Possibly if the ex-Secretary of the Land League is recalled, the difficulty between the two republics will be more easily arranged."

The Globe says: "There is a question whether if President Harrison's Government pushes the quarrel to an actual declaration of war, it may not find itself taken at its word in a way both unexpected and undesired."

Blaine Will Reply to Egan.

By Associated Press. WASHINGTON, Oct. 30.—At the Navy Department today there is no sign of disturbance over the Chilean affair. The San Francisco, which was at Callao, Peru, is believed to have sailed yesterday for California. She will touch at some port on her way, where she can be reached by cable if there is any need.

At the Cabinet meeting this afternoon the time was devoted to the discussion of the Chilean situation. It is surmised that Secretary Blaine submitted for consideration an outline of the reply to be made to Minister Egan's communication, that its details are perfected and that in due time it will be made public. There have been no further dispatches from Minister Egan or Commodore Schley.

Chili Demanded the Recall of Egan.

By Associated Press. NEW YORK, Oct. 30.—The Post states on the authority of a gentleman in this city who is in the confidence of the Chilean Government, that Chili instructed Senator Montt some time ago to demand the recall of Minister Egan as Persona Non Grata to the present Chilean authorities. It also states that the demand was shelved, to await the arrival of Senator Montt's credentials as Chilean Minister to this country. These arrived in a few days and the demand was repeated, but the State Department has taken no action as yet.

Indicted for Forgery.

By Associated Press. DENVER, Oct. 30.—Orville L. Smith, President of the Smith Brooks Printing Co., was indicted by the Grand Jury on five charges of forgery, and William M. Bliss, George Raymond and James P. Hadley, all ex-city officials, were indicted on fourteen charges, constituting forgery, larceny and embezzlement. The accused are said to have been members of a ring charged with robbing the city during the late administration.

Will Accept His Resignation.

By Associated Press. BOSTON, Oct. 30.—An Ottawa (Ont.) dispatch says: Premier Abbott has informed Secretary of State, Chapleau, that he would accept the latter's resignation rather than yield to his demands. Abbott sent for Colonel Oumet, ex-Speaker of the Commons, and offered him the position in the Cabinet now held by Chapleau, which Oumet declined until he could confer with his friend, the Secretary of State.

ARRESTED.

A Man Supposed To Be Abe Jones

Patented for Stage Robbery. To-day about noon Deputy Constable Schuyler Coats saw a man driving through town on a backboard who so completely answered the description of one Abe Jones, wanted at Redding, Cal., for robbing the Alturas stage on October 19th, that he hastily summoned Constable Upson and gave chase, overtaking him just above town, where he arrested him. From the description "Detective Thacker sent to the officers the outfit, backboard, team and man, they have evidently got the right man. The officers have telegraphed Detective Thacker and will probably hear from him to-night."

A New Flour Mill.

M. A. Monchamp and M. Q. Morgan loaded up at the depot this morning with one of the most complete new process flour mills on the coast for Surprise Valley. The farmers of Surprise evidently intend to get in the swim and furnish their property of flour to the world.

A GUARD FOR DILLON.

Reported Plot to Murder O'Brien.

INNOCENT MEN EXECUTED.

Civil War Expected in Guatemala Before Election.

Heart of Denver Claimed by Right of Pre-emption.

News from Guatemala.

SAN FRANCISCO, Oct. 30.—The steamship City of New York arrived today from Panama. She brings advices from Guatemala under date of September 25th, stating that Dr. Adrian Vidaurre, the native Jurisconsult, has been arrested for the attempted murder of Elias Strada, head authority of Zacaapa. The motive is supposed to have been a political one. He fired one shot at Strada, but the latter seized the revolver just as Vidaurre was about to fire again, and escaped unhurt.

Work on the Matagosa canal has been abandoned. It is estimated that the work cost Guatemala \$100,000.

San Salvador advices of September 22d say that the damage from the recent earthquake was not very great. The Government is vigorously prosecuting the work of interior improvement. A monument is to be erected in the Plaza Des Armas, in the city of San Salvador, to commemorate the glories of the republic.

Uneasiness in Guatemala.

By Associated Press. CITY OF MEXICO, Oct. 30.—It is said that several copies of the Republica, the Guatemala government organ, which have been received here, show that there is a spirit of uneasiness, and there will be a revolt of the entire army against the Barrillas government, which is becoming more despotic lately. The Republica comments in a lugubrious manner on the outlook for the coming Presidential election, and by its tone there is no doubt it expects the country to be torn by civil war before the elections come off.

Innocent Men Executed.

By Associated Press. SAN ANTONIO (Tex.), Oct. 30.—A letter from one of the federal officials at Rio Grande city, this State, says evidence continues to accumulate that the men executed by Garcia were not guilty of the offense for which they died, and that some of them were entitled to the protection of the stars and stripes, by reason of having formally declared their intentions of becoming American citizens. Reports have been received of other like executions, which were concealed by the Mexican militia.

The Heart of Denver Claimed.

By Associated Press. DENVER, Oct. 30.—The property owners of Denver are wrought up on a deed offered for record. It is by Jeff Hildreth to Marian E. Cole, transferring to the latter 480 acres of land in the heart of Denver, the title to which is claimed by right of pre-emption. Hildreth stating that he settled on the land 32 years ago. Should his claim be allowed upon it would involve property owners in endless litigation. The general opinion, however, is that the deed is worthless.

A Guard for Dillon.

By Cable and Associated Press. CORK, Oct. 30.—In consequence of the disturbed state of affairs in Cork the constabulary from all the outlying stations have been ordered to proceed immediately to Cork, and the whole force of mounted police at present in this county has been placed at the disposal of Dillon and will accompany him everywhere until the close of the political campaign.

Plot to Murder O'Brien.

By Cable and Associated Press. DUBLIN, Oct. 30.—The National Press of this city is responsible for the report, that there is a plot on foot to murder Wm. O'Brien. The same paper stated, that there was a plot to assault, if not to kill John Dillon; the police of Cork and of this city declare the story unfounded. The affair caused a sensation.

Massacre in Mexico.

By Associated Press. GUAYMAS (Mex.), Oct.—Information has reached this city of the burning of Mexico Santa Rosa and the massacre of several of its inhabitants by the Vague Indians on the night of Monday, October 19th. Soldiers were immediately sent in pursuit, but none of the Indians were captured.

Killed and Robbed.

By Cable and Associated Press. PARIS, Oct. 30.—The Petit Journal today publishes a dispatch from Madagascar, stating that Majunga, an important town on the coast of that island, was almost entirely burned. The loss is estimated at \$200,000.

The paper publishes news from the same islands of a massacre by bandits of Dr. Beriat, chief of the medical staff of the French colony at Subervierville, and eight native soldiers forming his escort. They were on their way to the town which was burned out, and while in boats on the Betsiboka river were attacked and killed by the bandits, who plundered their baggage and took possession of everything of value. A detachment of troops has been sent in pursuit of the bandits, but there is not much prospect that they will be captured.

John L. and Slavin.

By Associated Press. NEW YORK, Oct. 30.—Charley Johnston, the well-known sportsman, received a telegram last night from John L. Sullivan telling him to arrange for a fight with Slavin after June. Johnston afterwards had a consultation with other friends of Sullivan, and talked the matter over with Arthur Lemley, who said this morning that Johnston would back Sullivan to the extent of \$20,000.

"I have been trying for some time to find out if Slavin means business," said Lemley, "and my representative in London has been after him, but Slavin simply says he will do nothing until he comes to America."

Exterminating the Sect.

By Cable and Associated Press. LONDON, Oct. 30.—Advices received here from Yezd (Persia), describe the cruel persecutions at Babiseet. The government is said to be bent upon exterminating the Sect, and the government of the Province of Yezd, who is grandson to the Shah, had seven of the Sect strangled and beheaded. The members are rotting in prisons, many have fled to the deserts, probably to starve.

Effects of the Irish Rioting.

By Cable and Associated Press. CORK, Oct. 30.—The infirmaries of this city have been busy since early this morning attending to the injuries of persons hurt in last night's rioting. There are now 92 patients in the hospitals suffering from wounds received during the fighting. This number is in addition to a very much larger number of persons who are being treated at their own homes.

\$100,000 Fire.

By Associated Press. CLEVELAND, Oct. 30.—A four-story building, occupied as a warehouse, was burned this morning. A large quantity of malt burned, together with a stock of crockery. The loss is estimated at \$100,000.

PERSONALS.

C. C. Wallace went to Eureka this morning.

J. M. Fulton returned from the city this morning.

A. C. Vaughn left for Eagleville this morning.

W. B. Tiffany came up from Auburn this morning.

John R. Bradley came in from Deeth last night.

Miss Maggie Gordon of Carson is visiting friends in Reno.

Controller R. L. Horton came up from below this morning.

E. C. Douglas of the Carson News came up from below this morning. While away he bought a new press.

A. Hunnack, proprietor of the International Hotel, Virginia City, was a passenger from below this morning.

W. W. Coffin and wife are over from Dayton to attend the Washington Lodge. A. O. U. W., ball to-night. Wallace looks as young as ever.

Admission Day.

The Admission Day exercises at the public school today were very interesting. Professor Bray, in his opening remarks, gave a brief outline of the history of Nevada, through its various changes from a mining to an agricultural community. He urged the scholars to be proud of Nevada and help to make its future brighter. The series of questions on the history and geography of Nevada was conducted by Mrs. Doten, the answers being given by the pupils of the various classes.

Lending Money.

Wm. Beckham, president and manager of the People's Saving Bank, Sacramento, and the only man from California who has ever loaned a dollar in this State, is registered at the Riverside Hotel. Mr. Beckham has more money to loan at a low rate of interest, and anyone in need of money would do well to call on him. He will remain here until Sunday night.

All Nevada school children who expect to take part in the Admission Day parade to-morrow are requested to be at Masonic Hall at 12 o'clock.

A New Cure for Piles.

Fishing Piles are known by moults, like perspiration causing intense itching; when warm. This form, as well as blind, bleeding and protruding, yield at once to Dr. Ross's Pile Remedy, which acts directly on the parts affected, absorbs tumours, stops itching and effects a permanent cure. Druggists or mail, treatise free. Dr. Ross's, Piqua, O. Sold by S. J. Hodgkinson.

Gates to Put In.

The Electric Light Company will go right to work putting in heavy gates at the head of their new ditch on the south side. The gates will be made of 12x12 and 14x14 timbers and 12 feet high.

Are Your Children Subject to Croup.

As a preventive and cure for croup, Chamberlain's Cough Remedy has no rival. It is, in fact, the only remedy that can always be depended upon and that is pleasant and safe to take. There is not the least danger in giving it to children, as it contains no injurious substances. For sale at 50 cents per bottle by J. B. McCulloch, Druggist.

From Mrs. Henry Ward Beecher. "Orange St., Brooklyn, N.Y., Feb. 11, 1890."

"I have used Allcock's Plasters for some years for myself and family, and, as far as I am able, for many others, who come to us for assistance, and have found them a genuine relief for most of the aches and pains which flesh is heir to. I have used Allcock's Porous Plasters for all kinds of lameness and acute pain, and, by frequent experiments, find that they can control many cases not noticed in your signatures."

"The above is the only testimonial I have ever given in favor of any plaster, and if my name has been used to recommend any other it is without my authority or sanction."

Mrs. HENRY WARD BEECHER.

"BLACKMETACK," a lasting and fragrant perfume. Price 25 and 50 cents. For sale by J. B. Hodgkinson.

SHILOH'S CURE will immediately relieve Croup, Whooping Cough and Bronchitis. For sale by S. J. Hodgkinson.

A NASAL INJECTOR free with each bottle of Shiloh's Catarrh Remedy. Price 50 cents. For sale by S. J. Hodgkinson.

Notice to Contractors.

BIDS WILL BE RECEIVED BY THE Board of County Commissioners up to 5 o'clock on Monday, November 2, 1891, for the construction of a cistern on the Plaza opposite the Court House, for the use of the Reno Fire Department. The cistern is to be circular in form, 30 feet across and 10 feet deep, walled with brick laid in cement, and made water tight, and covered with redwood. The entire work to be done in accordance with specifications on file with the County Clerk. The Board reserves the right to reject any and all bids.

By order of the Board. O. H. PERRY, Clerk.

Reno, Oct. 28, 1891.

A Necessity.

The consumption of tea largely increases every year in England, Russia, and the principal European tea-drinking countries. But it does not grow in America. And not alone that, but thousands of Europeans who have ardent lovers of tea, upon arriving in the United States gradually discontinue its use, and finally cease it altogether.

This state of things is due to the fact that the Americans think so much of business and so little of their palates that they permit China and Japan to ship them their cheapest and most worthless tea. Between the wealthy classes of China and Japan and the exacting and cultivated tea-drinkers of Europe, the finer tea find a ready market. The balance of the crop comes to America. Is there any wonder, then, that our taste for tea does not appreciate?

In view of these facts, is there not an immediate demand for the importation of a brand of tea that is guaranteed to be unobjectionable, unmanipulated, and of absolute purity? We think there is, and present Beech's Tea. Its purity is guaranteed in every respect. It has, therefore, more inherent strength than the cheap teas you have been drinking, fully one third less being required for an infusion. This you will discover the first time you make it. Likewise, the flavor is delightful, being the natural flavor of tea-drinkers. Sold only in packages bearing this mark:

BEECH'S TEA

F LEVY & BRO.

A Manly Letter.

Jeremiah Lynch, Chairman of the Committee on Legislative Abuses of the San Francisco Grand Jury has written a letter to C. P. Huntington, the President of the Southern Pacific Company, asking him if his company was responsible for the action taken by Creed Haymond, the company's counsel, and of Stephen T. Gage and Richard Clute in refusing to appear before that body and testify as to the legislative blunder. Mr. Huntington most certainly sends a manly letter in answer to Mr. Lynch, that would seem to verify his statement so often made, that the "Southern Pacific Company were out of politics." Possibly the communication may be read with interest by some of that corporation's henchmen in this State and is here given in full:

SOUTHERN PACIFIC COMPANY,
OFFICE OF THE PRESIDENT,
23 BROAD STREET, NEW YORK
CITY, Oct. 19, 1891.

Hon. Jeremiah Lynch, Chairman of Committee on Legislative Abuses of the Grand Jury of the City and County of San Francisco—Dear Sir: Your valued favor of the 7th is received and its contents are carefully noted. I had also heard, through the public press of California, much of the matter referred to in your communication, to-wit: That the Grand Jury of the city and county of San Francisco were in session and were making inquiries to ascertain whether there was any truth in the rumors that were floating about the State to the effect that certain members of the last Legislature and others in high places had done things that were legally and morally wrong; further, that S. T. Gage and Richard Clute had failed to answer the call of the Grand Jury. You then write, referring to the "legal advocates" of those parties: "The foremost of these professional personages is Mr. Creed Haymond, who is understood to be the leading counsel in California of the Southern Pacific Company. You are the President of that corporation, and therefore I address you, desirous to know if this action of Mr. Haymond is of your knowledge and sanction."

Replying to this question I answer no. I did not know that Colonel Haymond was in the case until I saw it in the California papers, and I will say to you that I am very sorry he has had anything to do with the matter. I cannot, however, control Mr. Haymond's action, as the Southern Pacific Company has been in the habit of allowing any of its counsel heretofore to take outside business where he could attend to it without neglecting the interests of our company.

I particularly regret this action by Colonel Haymond because I have been told—and, I think, saw in some of the California papers—that the matters referred to in your letter had taken a political turn, so to speak, and, while I cannot believe such to be the case, yet the suggestion of it has made me more anxious that no one connected with me in the active management of the Southern Pacific Company should allow himself to take part in this or any other movement in California that was even suspected of having a political inclination. I have been, and still am, determined to get the Southern Pacific Company out of politics and confine it to its legitimate business of transporting persons and property. It has been meddling with it too long already.

Every officer of the company has as much as he can do if he does his duty in taking care of the properties that are controlled by the parent organization, as the greatest possible number of miles must be practiced in order to give any returns to the shareholders. Therefore the employees of the Southern Pacific Company have no time, or should have none, to give to matters political. I know, also, that the people are jealous—and rightfully so, I think—of any interference by corporations with their political prerogatives, which is one of the reasons why rates have been forced down so as not to remunerate those who have spent so much time and invested so much capital to create these properties. But the good sense of the people will soon correct the evils of low as well as high rates as soon as they know the corporations, as such, are not used for purposes other than those for which the law allowed them to be created.

I notice your request that I do what I can to assist the Grand Jury by "instructing the employees of the Southern Pacific Company to render proper and necessary assistance to that body."

I will write to Mr. N. A. Towne, our General Manager, and ask him to do all that he can consistent with his duty to so assist you and will send him a copy of this letter.

You ask, further, that I allow the Grand Jury to examine certain books of the Southern Pacific and Pacific Improvement Companies. These books cannot be taken from the offices where they belong without great inconvenience to the companies, and I keep their accounts in said books. Many of the books of many of the companies in California that I am in control, including the two above named, have been taken from their proper custodians into courts, and I think Grand Jury rooms, to the very great inconvenience of the companies, and I think it no case where the public is benefited; nor has the public, as I remember, ever claimed that they were benefited.

PARIS ILLUMINATED.

At Present the Best Lighted City in the World.

Paris is now on the eve of a revolution in her lighting system. Gas lighting was first introduced in England, but Paris followed in good time, and with a splendor unequalled elsewhere. In like manner, writes Dr. Albert Shaw, in Century, America, Germany and some other countries have been earlier in the use of electric lighting; but the Parisians with their superior taste and in all matters of municipal arrangement and appointments, are determined to make by far the most brilliant use of the new illuminant. Within one year, or within two years at the farthest, it is confidently claimed that Paris will be incomparably the best lighted city in the world and that electricity will have superseded gas in public use. In 1878, at the time of the universal exposition, the municipal government ordered the experimental illumination of the avenue de l'Opera and several open spaces with electricity; but the new system was not ripe for large use, and the experiment was soon abandoned. Its principal effect was the animals it gave to the gas company, which invented and put into use certain incandescent burners using 1,400 candle power, and giving a most brilliant light. The great electrical improvements of the past decade were exhibited in the French exposition of 1889, and were studied with the utmost care by the Parisian authorities and municipal engineers. Undoubtedly the displays at the exposition had the most pronounced effect in stimulating the new zeal Paris is showing for the appliances of the electric age.

A QUEER HOBBY.

The Benevolent Way in Which a New York Man spends His Money.

There is one man in New York to whose hobby, or whatever it may be called, no one can object. A Commercial Advertiser reporter dropped into a furnishing and clothing store on Nassau street the other day and saw one of the salesmen busily engaged with a well-dressed, partly old gentleman of benign expression who held a boy, ragged and unkempt, by the hand. A few moments later that urchin was taken into a dressing room, from which he soon appeared, and from head to foot in clothes such as he had probably never dared hope to ever possess. Hat and shoes, necktie and handkerchiefs completed the present to the little fellow, who was also given underwear enough to last six months. The old man and the lad he had befriended disappeared, and the reporter asked for a little information. "Why," said the salesman, "it is the delight of that man to clothe ragged street arabs. I suppose he comes in here or goes into some other store down town two or three times a week with a poor boy in tow, who is soon transformed into a decent-looking lad. It's his hobby, and a good one, too, I think. Don't you? He can afford it, and I believe the solid enjoyment he gets out of his pet way of getting rid of some of his surplus money is much greater than the pleasure many a rich man finds in his yacht or his horse."

A HUMAN BAROMETER.

How a Pennsylvania Man Foretells the Weather.

A gentleman who lives a few miles west of town, says the Windland (Pa.) Democrat, is a barometer in himself. He can tell when the temperature will lower or rise almost to the hour. Often he has predicted north winds, rain, etc., when there were no visible signs to bear out his assertions. He does not prognosticate by his feelings, but by some strange markings on his left forearm. These marks resemble the discharge of a Leyden jar as much as anything else. There is one mark about two inches long and a quarter of an inch wide, and from this project two other red lines. On the end of each of these is a blue spot. When the indications are for rain these two spots travel under the skin until they touch each other. When the probabilities are for wind or dry weather they separate until they are diametrically opposite. Physicians have examined the discolorations, and say that they are only some kind of pigment under the skin, and that they are similar in nature to birthmarks. They cannot explain the traveling propensities of these forerunners, however.

No More Drummers.

The traveling men in California object to the use of the word "drummer," as applied to members of their profession, and a movement is on foot to abolish the term. In olden times, says the San Francisco Movement, when it was the wont of quacks, fakirs and fairer mountebanks to make periodic visits to country towns on market days, they would wear a big drum to call up a crowd. This was called "drumming for trade," and it is presumed, and in fact generally accepted, that this is the origin of the offensive name. It is strange that in England, where the expression was first born, it is now unheard of in connection with commercial travelers. In that country traveling salesmen are called "bag men," or "knights of the grip," but in no instance would any of the fraternity countenance such an appellation as that of "drummer."

In the Nines.

The figure 9 is curiously and intimately connected with all the great gold mining excitements of the nineteenth century. The great Algerian gold bubble formed and broke in 1809. Next came the Montana mountain craze in 1829, when solid bowlders of gold as large as flour barrels were reported. The California gold fever broke out in 1849, and raged until counteracted by the Pike's Peak boom in 1859. Ten years later, in 1869, "Old Virginia," the celebrated mine, struck the lucky lead which made Virginia City and Nevada famous in the mining annals of the world. Eighteen hundred and seventy-nine came in on time with the Leadville frenzy and the famous "carbonates" of Lake county, Col. Eighteen hundred and eighty-nine broke the charm, but 1899 may make up for lost time, there being two 9's in that date.

MISCELLANEOUS.

Old People.

J. V. S. is the only Sarsaparilla that old or feeble people should take, as the mineral potash which is in every other Sarsaparilla that we know of, is under certain conditions known to be emaciating. J. V. S. on the contrary is purely vegetable and stimulates digestion and creates new blood, the very thing for old delicate or broken down people. It builds them up and prolongs their lives. A case in point:

Mrs. Belden an estimable and elderly lady of 810 Mason St., S. F., was for months declining so rapidly as to seriously alarm her family. It got so bad that she was finally afflicted with fainting spells. She writes: "While in that dangerous condition I saw some of the testimonials concerning J. V. S. and sent for a bottle. That marked the turning point. I regained my lost flesh and strength and have not felt so well in years." That was two years ago and Mrs. Belden is well and hearty to-day, and still taking J. V. S.

If you are old or feeble and want to be built up. Ask for
